DATABASES & WEB SERVICES

ASSIGNMENT 8

by Haider Qaizar Hussain, Nikoloz Mdivani, Qasim Muhammad Rashid

GENERAL DESCRIPTION:

The statistics for recording each action and the number of those actions is located inside the "stats" folder on Github. There are files which contain information regarding the imprint, errors, index, logins, searches, and maintenance. Also, there is a counter.csv file which contains the number of each aspect above counted and displayed on a single table. The "error_log" is used for "error.csv", and the "access_log" tells us about who accessed a specific page on our website and when by providing an IP Address.

(The script for Parsing and Plotting is in the "Weblog" directory on Github)

ERROR LOG:

Below is an image displaying the history of errors that popped up throughout development on the 22nd of November.
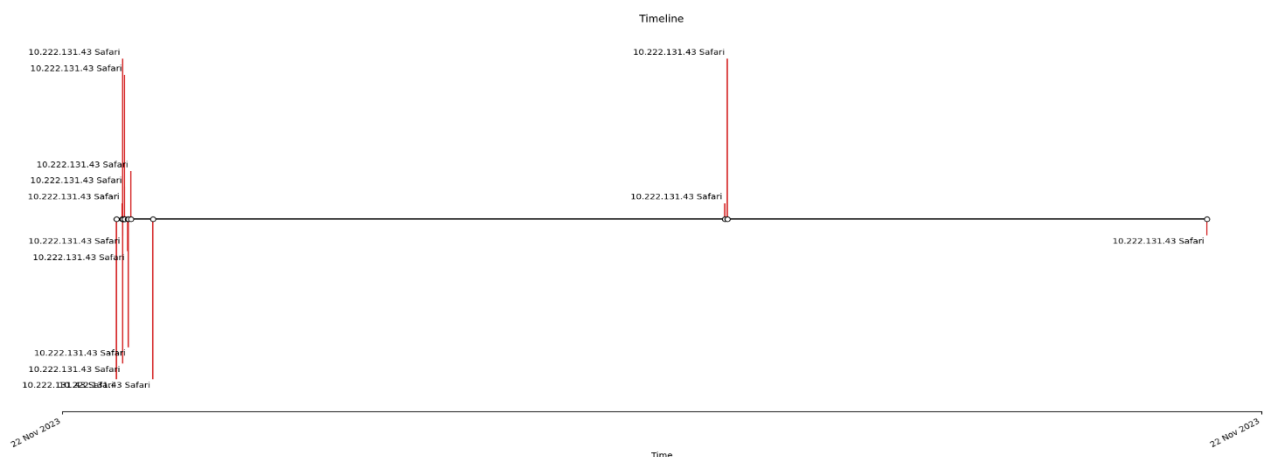

(error.png has been extracted from error logs from error.csv)

SEARCH LOG:

Below is an image containing the diagram of searches that occurred on the 22nd of November.

(File used for getting this diagram was the search.csv)

IMPRINT:

The Diagram below shows the history of the usage of the Imprint page, or the imprint.php.

(to create this diagram, Imprint.csv was used)

INDEX:

The Diagram below shows the history of the usage of the Imprint page, or the index.php.

(to create this diagram, index.csv was used)

MAINTENANCE:

The Diagram below shows the history of the usage of the maintenance page, or the maintenance-page.php.

(to create this diagram, maintenance.csv was used)

LOGIN:

Below is a PNG file depicting the diagram of records about who used the log in and when on the 22nd of November.

(login.csv is used for this)
